

Parks and Recreation Interactive Map

On Tuscaloosa.com, under the Live & Play tab, there is now a link to an interactive parks and recreation map called “Parks Interactive Map”. Once you click the link, it will open the map where you will have the option of either clicking a spot on the map or typing in an address. A legend is included that displays Tuscaloosa City limits along with showing each park as a color of the municipality it belongs in.

If a spot on the map is clicked, it will bring up an adjustable buffer area between 0-10 miles that will show you every park within that radius. If you select a park, it will show details such as the park amenities, park hours, photos, and facilities located within the park.

If an address is searched, it will also bring up an adjustable buffer and options that function the same as mentioned above. An added function is the ability to get printable directions from the address that was input to the selected park.

The information depicted on the map is subject to change and it is a continuously updated work in progress.
